"Let observation with extended view survey good thing from China to Peru" and he will not find anything of such astonishing merit in killing pains that flesh is heir to, as he will know is in Salvation Oil, when he has given it a fair trial.

One of man's first duties is that he should be a good intelligent citizen. In no way can this end be more easily reached than by a good school education. With this fact in view we call attention to the superior advantages presented by the Yale Union Schools in the line of a common school course. With the beginning of the New Year let us fill up each department, and make the most of our opportunities. Foreign pupils will receive special attention, and all pupils preparing to teach will receive special instruction in approved methods of teaching. The spring term begins Monday morning, January 6. Tunnel workmen encountered their first difficulty since the work of tunneling commenced, on Saturday, when they struck a vein of liquid clay in the heading. For about thirty-six hours they were kept busy shoveling the pasty stuff without being able to make a foot of headway. The ground over the spot, including a part of the street and a considerable space on the common to the west of the tunnel sank several feet. The trouble was overcome on Monday last, and the work has been going on since, with its accustomed regularity. The tunnel is now over 500 feet from the portal, on this side.—Sarnia Observer.

Growth of a big book.—When Webster's Unabridged was first published in one volume, it was a comparatively small book. Some years after, an addition was made of 1500 pictorial illustrations, a table of synonyms, and an appendix of new words that had come into use. A few years later came an entirely new revised edition of larger size, with 3000 pictorial illustrations; then, after an interval of a few years, a biographical dictionary of nearly 10,000 names, and a supplement of nearly 5000 new words were added; and now there has come another new and most valuable addition, a gazetteer of the world of over 25,000 titles. The work is now not only the best dictionary of the words of the language, but is a biographical dictionary, a gazetteer of the world and a great many other good and useful things in its many valuable tables.
